Memory game for my family

Design a memory game for your family. What kind of pictures would your family members like? Fruits and vegetables or maybe animals? Or some weird fantasy creatures? Or would you like to play with portraits of your family and relatives?

You are about to make pairs of picture cards (two similar pictures). Backside of all the cards should look the same. If it's possible, try to make the cards the same size as well (you can probably ask help of parents or siblings if it is hard for you to cut the same sized cards). You should make at least 10 card pairs. More there are players, more you need the cards. If you want, you can make the play cards together with your family.

When the cards are ready - play the game together with your family!

What do you need

Cardboard packages (e.g. cereals, rice, milk..) OR hobby cardboard, pens (e.g. color pencils, markers), scissors, one colored paper for the backside of the cards (you won't need this if you use a hobby cardboard), glue.

You can draw directly to the one colored side of the package. If the colors don't stick on the material, draw the pictures on normal drawing/printing paper and glue that on the cardboard.

Goal

This task will exercise your imagination, motoric skills (making you e.g. better in cutting with scissors) and you will have think how to make simple and interesting pictures that fit in a small scale.
