

High quality.
Made for You!

A+++

The most energy-efficient on the market.

Eko Watti is the first A++ rated energy-efficient window with an opening function on the market. It has quadruple glazing and a unique, protected outer frame structure.

0,5%

Lowest claims percentage

Surveys show that this product and service have received the fewest complaints on the market. The main reason for complaints has been damage in transit, which is covered by insurance.

Precise fit, to the millimetre.

Our design service can help you select the best windows and doors to match your needs. If you need tailor-made products, we can meet your needs precisely, to the millimetre.

97%

The highest Finnish-made content in the industry.

Only our aluminium is sourced from outside Finland.

TAILOR MADE DOORS – AT THE SPEED OF MASS PRODUCTION.

Our wide range of doors is designed to meet the needs of any home. The doors are suitable for **brand new homes** as well as **renovation projects**. These are doors you can trust: they **resist wear and bad weather** and they **stand the time**.

For renovation projects, we can provide products based on the actual measurements. Doors are made to order, available frame dimensions are in intervals of 10 mm. This ensures **you can always get the right door** from Lammi.

The modern manufacturing technology on our window and door production lines enables flexible and **individualised solutions** for all customers. And above all, it allows the windows and doors to be produced as **quickly** and with as **reliable** delivery dates as in case of mass production for standard windows.

When you need a **measurement and installation service**, our experts will be happy to help. We can offer you doors according to your individual needs. Just select the colour, pattern, opening, fittings, or all of these. The wide selection of Lammi windows and doors allows you to choose doors and windows that match your building.

EKO WATTI – APPRECIATED BY EXPERTS!

Eko Watti is the first A++ rated energy efficient window with an opening function on the market (as classified by Motiva). It has **quadruple glazing** and a **unique, protected outer frame structure** (PRH FI 7415/2007). Annual energy consumption is just 42 KW per square metre of window, with a U-value of 0.66.

Tailored to your needs.

WINDOWS – JUST AS YOU WANT THEM

Lammin windows are produced according to customer requirements, **right down to the smallest detail**. You can freely choose: dimensions, model, shape, glazing bars, insect frames, surface treatment. **Sound insulation, advanced locking system and fire protection** are all an integral part of each window. Lammin energy efficient windows ensure the optimal balance of thermal insulation between the windows and the wall structures.

FOCUSED ON QUALITY – SINCE 1972

Established in 1972, Lammin Ikkuna Oy is a **Finnish company** that manufactures windows and doors and focuses strongly on high-quality production and **customer service**. We take pride in supplying our customers with solutions that match their needs and in providing a full measurement and installation service. The company has always placed a strong emphasis on **product development** and **innovative thinking**.

Lammin windows and doors are produced using the **latest technology** and meet even **the most stringent of today's construction requirements**. We give each of our products a full 3-year structural warranty. Our windows and doors also come with a 35-year anti-rot warranty.
